

HARISH KRISHNAN

U.S. Citizen | Based In Chesterfield, New Jersey
harkrishnan2e@gmail.com | [GitHub: HarishKrishnaan](#) | 856-745-3416

PROFILE

Computer Science graduate from Rutgers University with experience in software development, front-end applications, SQL-backed workflows, debugging, data management, and technical documentation. Skilled in Java, Python, JavaScript, SQL, HTML/CSS, Git/GitHub, object-oriented programming, data structures, algorithms, and software testing. Interested in full-stack software engineering, user-facing web applications, APIs, and reliable production software.

EDUCATION

Rutgers University - New Brunswick
Bachelor of Science - Computer Science

May 2026

PORTFOLIO

Full-Stack Foundations, Software Development, Data Management, and Debugging

[Row Counter](#) | [JavaScript](#), [HTML](#), [CSS](#)

- Built a front-end counting application using HTML, CSS, and JavaScript.
- Implemented JavaScript logic to handle user actions, edge cases, and errors.
- Tested functionality across different inputs and refined behavior to improve usability and reliability.

[FP&A Forecasting and Variance Analysis Dashboard](#) | [Python](#), [Streamlit](#), [Pandas](#), [Plotly](#), [SQLite](#), [openpyxl](#)

- Built a dashboard that imports business data, validates inputs, generates KPIs, tracks run history, and exports Excel reports.
- Implemented data cleaning, file validation, SQLite storage, visual dashboards, and automated Excel exports.
- Used SQL-backed run history, reporting logic, and data validation to support reliable business workflows.

WORK EXPERIENCE

Golden Paws | Seasonal Daycare/Lodging Attendant

June 2021 - September 2024

- Supported daily operations in a fast-paced, hands-on environment requiring reliability, attention to detail, communication, and calm decision-making.
- Took responsibility for the safety and enrichment of groups of 30+ dogs while following procedures and responding to urgent situations.
- Trained and supported 5+ new employees across daycare and lodging procedures, improving consistency and team readiness.
- Resolved 25+ organizational errors related to pet item returns, improving accuracy, process reliability, and daily operations.

SKILLS

- **Languages:** Java, Python, JavaScript, C, SQL, HTML/CSS
- **Tools:** Git/GitHub, VS Code, IntelliJ, Excel, MySQL, SQLite, basic command-line tools
- **Software Concepts:** OOP, Data Structures, Algorithms, Debugging, Software Testing, Technical Documentation
- **Full-Stack Concepts:** Front-End Development, SQL Queries, REST API Concepts, Backend Communication, Agile/Scrum Concepts
- **Coursework:** Software Methodology, Data Management, Algorithms, Computer Architecture, Internet Technology, Data Science
